CIUBUCCIU ADRIAN ALBERT

Full Stack Developer

CAREER OBJECTIVES

I am a committed researcher, passionate about web development, web technologies, music and sport.

I want to push my limits as a Web Developer and continue to learn and expand my expertise across web solutions and capabilities.

PROGRAMMING LANGUAGES

- **JavaScript**, **Typescript**, HTML, CSS, LESS, SASS, **PHP**;
- SQL, PL/SQL;
- JS Frameworks & Libraries : **ReactJS**, **Next.js**, VueJS, AngularJS;
- PHP Frameworks & Libraries : Laravel, Magento;
- Apex and LWC
- Java, JavaFX;
- C++, C#, .NET;

VERSION CONTROL

- Git
- SmartGit
- Sourcetree

DEVOPS & TOOLS

- GitLab
- AZURE CI/CD Pipelines
- Bitbucket
- Jira & Confluence
- Jenkins

WORK SUMMARY

SALESFORCE DEVELOPER & ADMINISTRATOR
DELOITTE DIGITAL | AUG 2022-PRESENT

Responsabillities :
- Work on application full application lifecycle activities such as planning, analysis, design, implementation, testing,
- Develop high level solutions using **Apex** classes, Triggers, Visualforce pages, Lightning Components and **Lightning Web Components** based on the best practices;
- Design automated processes using Process Builders, Workflows, Approval Processes etc.
- Analyze functional specifications, analyze requirements architecture, challenge requirements architecture, draft design options;

FRONT END DEVELOPER
DELOITTE DIGITAL | MAY 2023-PRESENT

Responsibilities :
- Develop with **React** and **Typescript** on a Deloitte Internal Project (CMS)

FULL STACK DEVELOPER
NEWROCO | APR 2022-AUG 2022

Responsabillities :
- Worked with HTML, CSS, SASS, LESS, Bootstrap, **PHP**, **JavaScript**, jQuery and **VueJS**;
- I've created from scratch an app with **VueJS** and **PHP** stack;

FULL STACK DEVELOPER
CLOUDLAB | MAR 2021 - APR 2022

Responsabillities :
- Mainly worked with HTML, CSS, LESS, **PHP**, **JavaScript**, jQuery, **Magento**, **VueJS**, **Laravel**, **KnockoutJS**;
- Create and debug new/old Modules implemented in **Magento** 2/ **Laravel**;
- Identify and fix compatibility issues involving CSS, HTML, and scripting, often between a series of different platforms and browsers;

WEB DEVELOPER & PROJECT MANAGER
INTERACTING MINDS VENTURES | SEP 2020 - MAR 2021

Responsabillities:
- Search Engine Optimization (SEO) : including analyses, keyword research and strategy, Wordpress plugin integrations, etc.
- Content Marketing;
- Social Media Advertising : Google AdWords, Facebook Campaigns, and others;
- Web Development;
- Email Marketing, PR and Native Leads;

ASSISTANT MANAGER
CLEARSKY NETWORK | JUN 2018 - MAR 2021

- In the first 2 months of activity I learned international law and how to incorporate companies under SVG and Estonian jurisdiction;
- I developed a web application for task management in HTML, CSS, **JavaScript**, **Ajax**, **jQuery**, and **PHP** programming languages;
- I did create and customize themes in Wordpress;

CIUBUCCIU ADRIAN ALBERT

Full Stack Developer

SALESFORCE ACHIEVEMENTS

- Salesforce Administrator Certification
- Salesforce App Builder Certification
- Salesforce Associate Certification

SALESFORCE TECHNOLOGIES

- Field Service, Asset360
- Sales Cloud
- Service Cloud

STRENGTHS AND ABILITIES

- I am **ambitious** and I have the **love of learning;**
- **I am a fast learner and very adaptive.** A proof of this is the fact that I did work with a lot of web technologies and frameworks and I've learned them fast;
- **I** am a great **team player**, and **proactive :** I often offer to help my colleagues to finish the tasks in a timely manner so the project will run smoothly;

ACADEMIC BACKGROUND

JAVASCRIPT FRONT END DEVELOPER WITH ANGULAR
Software Development Academy | 2020 - 2021

- Advanced HTML and CSS;
- Advanced **JavaScript**;
- CSS Framework **Bootstrap** and preprocessors LESS ans SASS Version Control Git;
- Responsive Design;
- Best Practices in Web Development;
- JavaScript Framework **Angular**;

BACHELOR OF INFORMATICS AND ECONOMICS
"Alexandru Ioan Cuza" University of Economics and Business Administration | 2016-2019

I've learned the basics of web development and databases management. During the University courses, I made projects in **Wordpress**, **HTML, CSS, JavaScript, PostgreSQL, C#, Java** and **Spring**. In the last part of the university I combined the programming knowledge with the knowledge of economics.

PROJECTS

AI PROMPTING APP

Promptopia is created with **Next.js**, **Tailwind CSS** and **MongoDB**. This app represents an open source AI Prompting tool that helps users to discover, create and share creative prompts for AIs such as ChatGPT. The user can search for tags, usernames or prompts of other users. Also, the user can create, edit or delete prompts. Basically this project represents a Full Stack Next.js 13 CRUD application.

FOOD ORDER APP

The Food Order App is done with **React**, **Typescript** and **Firebase**. It uses all the core React features such as hooks and custom hooks, form handling, styled components, portals, http requests handling and so on.

BUDGET APP

HappyBudget is a web application developed in **AngularJS** (with Json-server for database). The main accomplishment are the CRUD operations over the retrieved wallets and its transactions. Also, an AngularMaterial template was used for the start-up design.

DASHBOARD WITH STOCK AND TASKS MANAGEMENT

This web application was developed using HTML, CSS, Javascript, Ajax, jQuery and PHP technologies during my working period at Clearsky Network. Since I was the only web developer, I made both the front end and the back end parts of the application.
The purpose of the application was :
- Handle and streamline the task management
- Have Interaction between 3 different type of users
- Have an integrated chat service
- Have an integrated notification service
- Have CRUD operations, according with each type of user
- Have an Authentification system

Developing this application increased my programming skills on Front End and Back End development, as well as the ability to debug code. Also, I've learned to work with sprints, targets and use Github. Worth mentioning is the fact that I used SQL and PHP to store and retrieve accurate data effectively, and I used DataTables (https://datatables.net/) plug-in for jQuery.
